If you ever imagined what a 3D sperm battle would be like then this is the game for you!!

#1 game of the year. What does a virgin say after her first bj?. This game drops you into the life of a sperm. The unrelenting hunt for the egg...The immeasurable death...Brothers...Sisters...No more. Highlander meets the evasive ♥♥♥♥♥♥. There can be only one!

Have a seat and ♥♥♥♥♥♥ enjoy the relentless battle for life. Also, sperm photon torpedos...that's a thing now.. 10/10 Would fap again.. More exciting than a trench run on the Death Star.. Well now to be honest I always wanted to know what it was like to be a sperm, and well Spermination gave me that in site and boy was I blown away. The journey is a tough one indeed, I had billions of the little tackers to pass and boy are they fitter than poor little me, maybe I need more Iron so I can over take them all o-O

Anyway I'm down voting this game, because the control I had was not great, my spermie moved rather slow even with the speed power up, maybe he / she was a reject and this happens I guess o-O

Also it does not play great with the Xbox controller and this feature could be added and or improved. I mostly used the mouse and WASD mostly W to move forward and mouse to fire and move in circles and side ways. I don't know maybe I'm doing it all wrong, I have no Idea. But I do Know is my mouse hand got very sore, so I had to take a break from playing the game o-O

Also you cant buy very many different firing guns, Armour and speed options. I feel there could be more and better weapons and Armour with the \$'s you collect along your journey. As every play through you have to buy the items which is called prepare your load, well I prepared alright, but the best I got to the egg was 12 and so I threw in the towel as my hand got very sore after many try's.

Also if you do choose to get this game be warned, it crashed for me at the start. You must update java or you cant play the game, see forums for help with this issue, if unsure.

Price wise ! Well maybe wait for a very good sale as to me this game does not offer very much and you can get rather board very quickly playing it constantly.

Sadly I never made a baby, maybe I can try again another time. Perhaps the developers will improve the game and maybe add achievements and improve the performance of the game, so we have a much better success rate o-O. made me♥♥♥♥♥♥in 10 seconds. 6/9 Would play again. Fun game that brings back memories of Tie Fighter and Slip Stream 5000.

I finally felt young again.. This game should be used in sexual education classes. This game offers a lot of fun for its price (Especially since I got it for £1). It lacks in replayability once all the achievements are acquired as there isn't much to do other than race sperm through a bullet hell.

Would love to see a multiplayer version of this game but even if it were to happen I doubt you'd find 999 other players to be a sperm with, and over half would die instantly...

Great game.

. A ridiculously silly game. This game is childish but still fun. 10/10 would recommend.. Should've played this for sex ed. 10/10. Crashes on game start 10/10 lol
Game itself is pretty easy, go weaponless light armor /w booster and speed engine, aim for the yellow speed pickups that are on your way through the course not way off top of the map, win game.. I shoot blanks so this is the closest I can get to the real thing.. I love this game to ♥♥♥♥ing bits, but god damn does there really need to be a 500 kill achieve?. this game will get so popular if it had multiplayer

- Phr00t. v1.15: More Controls Help:

Hey guys! I greatly appreciate the good reviews & I'm glad you are enjoying the game :-)

I noticed some were having trouble using the specials, so I added a label that says "Spacebar to use" (or whatever the special key is) on purchases that require activation.

I also added a pop-up message if you don't have enough energy to use a special (like the booster, which requires full energy).

Controls tip: you don't have to hold down the accelerate button if you are already going at full speed in the direction you want.

You can let go, look around and shoot in different directions. You'll continue going straight until you accelerate elsewhere!

I do have another random event *coming* in development, stay tuned!
